

WI DOT Implements of Husbandry Meeting  
Aug 29, 2013

### MEETING NOTICE

**Date: August 29, 2013**

**Time: 7:00 – 8:30 PM**

**Place: WisDOT US 41 Field office  
1940 West Mason Street Green Bay, WI**

**Type: Implements of Husbandry Town Hall Meeting presented by WiDOT**

Agricultural equipment is getting larger and heavier, which helps in more efficient farm production, but it can also impact pavement and road structures. That's why the Wisconsin Department of Transportation, in partnership with the Wisconsin Department of Agriculture, Trade and Consumer Protection, convened the Implements of Husbandry (IoH) Study Group. It involved over 20 stakeholders representing various transportation and farm organizations, equipment manufacturers, law enforcement, local officials and the University of Wisconsin-Madison/Extension.

The group came up with several options that could lessen the impact of IoH equipment on our roads, while balancing the needs of the agricultural community. These options will be shared at a series of town hall meetings to be held throughout the state this month.

The agricultural community, local highway officials and others are urged to attend the meetings. Sessions will provide detailed information on the recommendations of the study group including size and weight limits and other issues related to agricultural equipment, also known as implements of husbandry (IoH).

---

Marilyn Fahrenkrug, Clerk

It is possible that members of and possibly a quorum of members of other governmental bodies of the municipality may be in attendance at the above stated meeting to gather information; no action will be taken.
